Re: Property located in Northport, Washington – (b) (6)

Dear (b) (6)

Greetings. I am an On-Scene Coordinator with the U. S. Environmental Protection Agency (EPA). I am contacting you regarding your property located in Northport, Washington, specifically (b) (6) that was sampled by EPA in 2004. The soil sampling that was conducted by EPA in 2004 was part of an area-wide sampling effort in the town of Northport through a voluntary sampling program. The analytical results of soil samples collected from your property in 2004 revealed the presence of lead in soil at elevated concentrations. EPA is currently evaluating the potential for conducting soil removal actions at properties in Northport with elevated lead concentrations detected in 2004. Currently, EPA is reaching out to property owners to obtain permission to access their property for purposes of conducting a walk-through to assess current conditions. Your property, (b) (6) (b) (6), is among the properties that EPA would like to visit to assess current conditions. At this time, EPA is requesting your permission to visit the above referenced property to conduct the following activities:

- Meet with the property owner and/or representative(s);
- Perform a walk-through of the property; and
- Take photographs of the property

Enclosed with this letter is an access agreement that will allow EPA representatives to enter your property for the above activities. Please sign and return the agreement within two weeks of receipt of this letter. Upon receipt of the signed agreement, I will contact you or your representative to coordinate a schedule to visit the property. EPA representatives plan to be in the Northport area between October 24 and October 30, 2019, to conduct the property visits. The signed access agreement can be mailed to:
